

## **Vision**

The Kansas Supreme Court's vision for Kansas eCourt and the statewide implementation of centralized case management is:

- More efficient, effective court operations, and increased access to justice for the people of Kansas.
- Enabling web-based court documents, calendars, case records, exhibits, and other digital content.
- Standardized statewide case processing that enables workshare and provides a consistent user experience.

## **Guiding Principles**

- 1. Understand and learn how to use Odyssey applications before they are implemented.
- Customize Odyssey applications only when necessitated by law or Supreme Court rule.
- 3. Prioritize, establish, and follow uniform business processes in all court divisions and locations.
- 4. Include broad representation from appellate and district courts on the implementation team.
- Invite and consider input from justice partners during team discussions.
- 6. Make timely decisions informed by multiple viewpoints to achieve statewide solutions.
- 7. Support substantial time commitment required of team members to fully and effectively participate in implementation.

Chief Justice Lawton R. Nuss, Kansas Supreme Court

Nancy Dixon, Judicial Administrator

- 8. Carefully consider Tyler's input on statewide Odyssey implementation.
- Effectively manage organizational change by clearly identifying project goals, providing frequent project updates, explaining new or updated processes, and providing training.
- Follow communication channels by directing comments, questions, or requests for Tyler to OJA project managers.
- 11. Act individually and collectively as project champions to support programming requirements that improve effective and efficient judicial branch operation.
- 12. Draw from individual experiences and knowledge when evaluating issues and seek the best outcome for the state as a whole.

Justice Dan Biles, Chair, eCourt Steering Committee

Justice Caleb Stegall, Vice Chair, eCourt Steering Committee
